178 of the Kanuri, and the advantages which they have brought are readily understood. Other material changes--the postal system, telegraphs, electricity in Maiduguri, and the Maiduguri airport--only affect a small part of the population in the cities, and consequently are of minor importance.

654 178 Deliberate attempts have been made to institute changes in certain areas of Kanuri culture, with varying degrees of success. Agricultural programs have been introduced through the Bornu Native Authority. Veterinary and Forestry Depart- [743] ments also exist. Dispensaries run by Kanuri Malams exist in the larger towns. There is a hospital in Maiduguri staffed by [751] two European doctors. The Kanuri prefer their own form of treatment and rarely go to the dispensaries or to the hospital when ill. Nor do the Kanuri dispensars themselves have much faith in the medications which they distribute.

E. The Dynamics of Acculturation

101 The town of Geidam, in which the present study was carried [563] out, is in the northern part of Bornu, among a Kanuri sub-group 131 known as the Manga. Geidam is twenty-five miles south of Nigeria's northern boundary, a remote and somewhat isolated town 134 in one of the least developed provinces of Northern Nigeria. It is a town of mud surrounded by a world of sand, and the presence of the desert to the north is felt everywhere, in the land and in the people.

177 Though Kanuri culture is still an integrated and function- 121 ing whole, the influence of the Industrial West is bringing about

turn divided into craft work, sales of surplus agricultural products, and a complex middleman trade between markets. There is a large variation in dependence upon the market as against subsistence agriculture for obtaining total income, although some farming is carried on by almost everyone except a few full-time specialists.

The society is stratified, with status based on tribal membership, occupation, birth, age, wealth, and to some extent, urban residence identifications. The people recognize two major class divisions — the upper or ruling class (*Kəntuoma*) and the broad base of the peasant class (*tala*), under the autocratic hegemony of the rulers. Rosman (1959) uses eight separate categories of social status in his work on Kanuri acculturation. Cohen (1959) has used status gradients and their inter-relationships to explain social differentiation, upward mobility, and class structure.

The society has a monarch, the Shehu, in his capital city of Maiduguri, and courtly life with nobles, including *Ajia*, or District Heads, who live in their own district capitals as sub-rulers of twenty-one segments of the emirate under the Shehu. District Heads in turn have under their jurisdiction a group of contiguous Village Area units headed by *Lawan* or Village Heads. Under these latter are Hamlet Heads, *Bulama*, in charge of small settlements of contiguous compounds. Peasants call themselves the peasants of such and such a *Lawan*. Today the Native Administration departments have their personnel stationed throughout the districts. Along with the District Head and his followers they form an urban upper class living in the districts throughout the state.

The Situation

As part of a general programme of economic development in Northern Nigeria, agricultural research stations have been set up by the government in every province of the region. The results are published in annual reports so that Agricultural Officers may begin introducing new seeds, fertilizers, and even new crops on a wide scale as soon as these improvements are known to be feasible under local conditions.
